ALI MAHMOOD

PYTHON DEVELOPER & ETHICAL HACKER

Email: zalizone@gmail.com
WhatsApp: +92 309 7413187
Fiverr: fiverr.com/s/NNX7g1R
Location: Pakistan (Available Globally / Remote)

// PROFESSIONAL SUMMARY

Security-centric **Python Developer** and **Penetration Tester** with 3+ years of coding experience and a 100% ethical track record. Proven expertise in automated vulnerability scanning, black-box web and network auditing, and full-stack web engineering. Creator of 15+ production projects, including AI vulnerability scanners and high-scale educational portals serving thousands of students across Pakistan.

// CORE TECHNICAL SKILLS

Languages & Scripting:	Python (Advanced), JavaScript, C++, Bash Scripting, HTML5/CSS3
Security & Pentesting:	Web App Auditing (OWASP Top 10), Network Assessment, Vulnerability Analysis
Security Tooling:	Nmap, OWASP ZAP, Metasploit Framework, Wireshark, Burp Suite, Kali Linux
Web & Frameworks:	Next.js, React, Node.js, RESTful APIs, Git, GitHub, Linux Server Admin

// FEATURED PROJECTS & PRACTICAL AUDITS

VulnAI – AI-Powered Vulnerability Scanner *Lead Security Architect & Developer*

- Built an automated scanner integrating **Nmap** and **OWASP ZAP** with Google Gemini AI for deep security analysis.
- Parsed complex security scan dumps into prioritized severity matrices (Critical, High, Medium, Low) with automated remediation.
- Generated audit-grade PDF reports equipped with code-level fix recommendations for engineering teams.

Medical Platform Security Audit *Black-Box Penetration Tester*

- Executed an unauthorized-scope black-box penetration test against a live medical platform web app and host server.
- Discovered critical CVE exposures: legacy Apache 2.2.8 on Port 80 and outdated TLS 1.0 protocols on Port 443.
- Delivered an executive vulnerability report detailing exact remediation steps: TLS 1.3 enablement and strict HTTPS enforcement.

Pathora – Entry-Test Prep Ecosystem (pathoras.vercel.app) *Full-Stack Web Architect*

- Architected a 100% free educational portal featuring 14 integrated tools serving thousands of Pakistani university candidates.
- Built AI mock test engines (NUST NET, FAST-NU, ECAT), aggregate merit calculator, and 188 universities comparison directory.
- Delivered sub-second load times, mobile-responsive glassmorphism UI, and high-concurrency availability on Vercel.

// CERTIFICATIONS & RECOGNITIONS

- **Certificate of Appreciation:** Medix Prep Point (Website Security & Maintenance)
- **Certified Ethical Hacker (CEH):** Principles & Methodologies
- **CompTIA Security+:** Network Defense & Threat Analysis
- **eLearnSecurity Junior Penetration Tester (eJPT):** Fundamentals

// KEY ACHIEVEMENTS

- **15+ Production Deliveries:** Shipped custom web applications, Python automation bots, and cybersecurity tools.
- **5+ CTF Competitions:** Solved challenges spanning cryptography, web exploitation, and reverse engineering.
- **100% Ethical Stance:** Dedicated to defensive security posture, secure software development, and responsible disclosure.
